NOUMAN SAJID

Full-Stack Software Engineer | Agentic AI & Backend Developer

Okara, Pakistan | +92 313 6823997 | noumansajid623@gmail.com | linkedin.com/in/muhammad-nouman-sajid-92343842b | github.com/alfa546

EDUCATION

National Textile University | *Bachelor of Science in Computer Science* 2024 – 2028

- **Specialization:** Artificial Intelligence, Machine Learning & Full-Stack Systems Engineering.
- **Relevant Coursework:** Data Structures & Algorithms (DSA in C++), Object-Oriented Programming (OOP), Database Management Systems (SQL), Artificial Intelligence, Software Engineering.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), C++, C#, SQL, HTML5, CSS3

AI, ML & Automation: LangChain, LangGraph, RAG Pipelines, Multi-Agent Systems, Scikit-learn, NumPy, Pandas, Playwright, BeautifulSoup4, lxml

Frameworks & Backend: FastAPI, Flask, Next.js (App Router), React.js, Tailwind CSS, SQLAlchemy, RESTful APIs, Server-Sent Events (SSE), OAuth2

Databases, DevOps & Cloud: PostgreSQL, SQLite, Redis, Supabase, Docker, Docker Compose, Linux (Kali/Ubuntu), Git, GitHub Actions, Vercel, Render, DigitalOcean

EXPERIENCE

Efahida | *Full-Stack Software Developer (Remote)* July 2026 – Sept 2026

- Architected and deployed production full-stack web applications using React, Next.js, and relational backend databases, ensuring low-latency API communication and strict schema integrity.
- Optimized backend query execution, frontend bundle delivery, and caching workflows to improve end-to-end page load performance and support scalable business operations.

Fly Rank AI | *Frontend AI Engineer (Remote)* June 2026 – Aug 2026

- Engineered responsive, high-throughput React and Next.js interfaces integrated with LLM-driven backend pipelines and real-time streaming responses.
- Collaborated across product and AI engineering teams to streamline complex data visualization workflows and elevate user engagement metrics.

PROJECTS

Think-Space.dev | *Full-Stack Technical Publishing Platform (Next.js, React, TypeScript)* 2026

- Architected a full-stack technical publication and problem-solving platform (think-space.dev) serving engineering guides, research-backed solutions, and interactive developer utilities.
- Engineered dynamic category filtering, author profiles, read-time estimation, and Lighthouse performance optimizations (deferred script loading, subsetted icons, and WebP asset delivery).

Auto-Apply-AI | *Autonomous Multi-Agent AI Platform (Python, FastAPI, Next.js, Playwright)* 2026

- Built an end-to-end multi-agent platform (github.com/alfa546/Auto-Apply-AI) with a FastAPI async engine, PostgreSQL, Redis, and Next.js 16 dashboard to parse PDF/DOCX resumes, compute real-time ATS scores, and aggregate jobs across Adzuna and Jooble.
- Automated headless portal form-filling via Playwright and Gmail OAuth2 dispatch with randomized anti-spam throttling, daily quota enforcement, and LLM-powered inbox reply classification.

Crawler | *Enterprise Technical SEO & Web Audit Engine (Python, Flask, Playwright, Docker)* 2026

- Engineered a concurrent, self-hosted technical SEO crawler (github.com/alfa546/Crawler) using ThreadPoolExecutor with per-host politeness locks, adaptive backoff, and headless Chromium (Playwright) for SPA JavaScript rendering.
- Implemented 50+ automated on-page and indexability checks, AI-bot visibility auditing (GPTBot, ClaudeBot), n-gram near-duplicate detection, live SSE progress streaming, Lighthouse PageSpeed integration, and bulk CSV/XLSX/XML sitemap exports.

HEALTHFIT-OS | *AI Health, Biomarker Analytics & Fitness Platform (Python, Flask, Scikit-learn)* 2026

- Developed a unified health and fitness operating platform integrating clinical biomarker tracking, vital metrics analysis, and machine learning risk prediction (Random Forest classifier achieving 94.5% accuracy).
- Built an interactive daily nutrition analyzer, personalized workout and meal plan generator powered by LLM APIs, visual risk gauges, and automated clinical PDF report generation.
